

To whom it may concern, I urge you to take action to insure that WIMZ 's signal stops interfering with my ability to listen to WPVM when I am working and doing business/ shopping in Asheville NC. I also endorse your support for the lifting of the third adjacent channel rule as a way to make LPFM more acessble to the listening public.I think that LPFM stations are a bright light in the world dominated by cororate radio please do all you can to increase there number and insure their viability. Sincerely
Diane
